### Volume 218 (1989)

#### Research Papers

Effect of the *uvs-2* allele of *Neurospora crassa* on the mutagenic potency of two *N*-hydroxylaminopurines and 2-aminopurine in the *ad-3* forward-mutation test

H.E. Brockman, F.J. De Serres, C.Y. Hung and T. Ong (U.S.A.)

1

Testing of hydralazine in *in vivo*-*in vitro* hepatocyte assays for UDS and stimulation of replicative DNA synthesis

E.C. Puri and D. Müller (Switzerland)

13

Mutations at six additional loci of *Drosophila melanogaster* cause alkylation hypermutability

P.D. Smith and R.L. Dusenberry (U.S.A.)

21

*Rad-2*-dependent repair of radiation-induced chromosomal aberrations in *Caenorhabditis elegans*

T. Sadaie and Y. Sadaie (Japan)

25

The effect of deoxynucleosides on repair of DNA breaks in UVC-irradiated human lymphocytes

M. Holmberg (Sweden)

33

Normal inhibition of DNA synthesis following  $\gamma$ -irradiation of radiosensitive cell lines from patients with Down's syndrome and Alzheimer's disease

M.F. Lavin, P. Bates, P. Le Poidevin and P.C. Chen (Australia)

41

#### Review

Structure-function studies of the T4 endonuclease V repair enzyme

M.L. Dodson and R.S. Lloyd (U.S.A.)

49

#### Research Papers

Poly(ADP-ribose) catabolism in mammalian cells exposed to DNA-damaging agents

R. Alvarez-Gonzalez and F.R. Althaus (Switzerland)

67

Decreased stable transfection frequencies of six X-ray-sensitive CHO strains, all members of the *xrs* complementation group

P.A. Jeggo and J. Smith-Ravin (Great Britain)

75

Effects of UV light on DNA chain growth and replicon initiation in human cells

T.D. Griffiths and S.Y. Ling (U.S.A.)

87

Epistasis, photoreactivation and mutagen sensitivity of DNA repair mutants *upr-1* and *mus-26* in *Neurospora crassa*

C. Ishii and H. Inoue (Japan)

95

Enhancement and inhibition of mutation by *o*-vanillin in *Escherichia coli*

K. Watanabe, T. Ohta and Y. Shirasu (Japan)

105

*PSO4*: a novel gene involved in error-prone repair in *Saccharomyces cerevisiae*

J.A.P. Henriques, E.J. Vicente, K.V.C.L. Da Silva and A.C.G. Schenberg (Brasil)

111

DNA repair mechanisms affecting cytotoxicity by streptozotocin in *E. coli*

R.J. Fram, S.L. Mack, M. George and M.G. Marinus (U.S.A.)

125

Combined effect of dimethylnitrosamine and a lysine-restricted diet on *O*<sup>6</sup>-methylguanine-DNA methyltransferase levels in mouse tissues

M. Klaude, G. Persson and A. Von der Decken (Sweden)

135

Identification of 4 ataxia telangiectasia cell lines hypersensitive to  $\gamma$ -irradiation but not to hydrogen peroxide

O. Cantoni, P. Sestili, M. Fiorilli, M.P. Santoro, M.C. Tannoia, G. Novelli, F. Cattabeni and B. Daulapiccola (Italy)

143

Xeroderma pigmentosum complementation group XP-I withdrawn

D. Bootsma, W. Keijzer, E.G. Jung and E. Bohnert (The Netherlands, F.R.G.)

149

Cloning and expression of the *Bacillus subtilis* methyltransferase gene in *Escherichia coli ada*<sup>-</sup> cells

K.-i. Kodama, Y. Nakabeppu and M. Sekiguchi (Japan)

153

Comparison of  $\gamma$ -radiation-induced accumulation of ataxia telangiectasia and control cells in *G*<sub>2</sub> phase

P.R. Bates and M.F. Lavin (Australia)

165

Identification of a HeLa mRNA fraction which can correct the DNA-repair defect in Fanconi anaemia fibroblasts M. Digweed and K. Sperling (Germany)	171
$\beta$ -Galactosidase overexpression in SV40-transformed Chinese hamster fibroblasts exposed to mutagens as a result of amplification of transfected bacterial <i>lacZ</i> DNA sequences J.-M. Clément, M. Jehanno and M. Hofnung (France)	179
Thymidine kinase deficient human cells have increased UV sensitivity in their capacity to support herpes simplex virus but normal UV sensitivity for colony formation A.J. Rainbow (Canada)	189
Enhanced <i>O</i> <sup>6</sup> -methylguanine-DNA methyltransferase activity in transgenic mice containing an integrated <i>E. coli ada</i> repair gene S. Matsukuma, Y. Nakatsuru, K. Nakagawa, T. Utakoji, H. Sugano, H. Kataoka, M. Sekiguchi and T. Ishikawa (Japan)	197
The LexA protein does not bind specifically to the two SOS box-like sequences immediately 5' to the <i>phr</i> gene N.S. Payne and A. Sancar (U.S.A.)	207
UV-enhanced reactivation of UV-damaged SV40 is due to the restoration of viral early gene function T.C. Brown and P.A. Cerutti (Switzerland)	211
<i>Erratum</i>	219
<i>Announcement</i>	220
<i>Contents, Vol. 218 (1989)</i>	221
